

# NESS Wonders

## Augmented Reality Visitor Guide

Christ the Redeemer - Rio de Janeiro, Brazil

One of the New Seven Wonders of the World

# Welcome to NESS Wonders

Thank you for choosing NESS Wonders. This guide will help you make the most of your augmented reality visit to Christ the Redeemer, one of the most iconic monuments on Earth.

With 80 scannable points of interest, an audio guide in 10 languages, a narrated guided tour, a gentle proximity detector, offline support, a 3D map, and an AI historical guide, NESS Wonders turns your device into a window into history - in your own language.

## Available in 10 Languages

English, Chinese, Hindi, Spanish, French, Arabic, Portuguese, Russian, Japanese and German. Pick your language from the globe icon on the home screen or in the AR top bar. All interface text, point titles and audio narration adapt to your selection.

## Getting Started

1. Choose your language using the globe icon.
2. Press 'Start AR Experience' on the home screen.
3. A glowing pink fluorescent line marks the recommended tour path.
4. Pink hotspot markers indicate scannable points of interest.
5. Tap any hotspot to scan it and reveal information and audio.

# Key Features

## 80 Scannable Points

From the outstretched arms to the chapel altar, from construction history to panoramic views of Rio, 80 carefully curated points let you explore every facet of the monument and its surroundings.

## Audio Guide

Every point includes a spoken narration in your selected language. Tap the Listen button in the info panel to hear the story, or let the guided tour play it for you automatically.

## Guided Must-See Tour

Press 'Guided Tour' to start a narrated walk through the highlights. The app approaches each must-see point, gently vibrates to get your attention, opens its story and narrates it, then moves on to the next.

## Proximity Detector

As you approach each scannable point, your device vibrates gently and shows a message with the point's name. Toggle proximity alerts on or off with the bell icon in the AR screen.

## Offline Mode

NESS Wonders installs as an app you can use offline. After your first visit, the app and all 80 point explanations are saved on your device, so you can explore without a connection. Live translations and audio narration need a connection the first time, then are cached for reuse.

## AR Navigation Path

A pink fluorescent line guides you through the site. Toggle it on or off with the navigation icon in the top-right of the AR screen.

## 3D Map

Open the 3D map to see the entire site in three dimensions. Rotate, zoom and explore the positions of all 80 points of interest.

## AI Historical Guide

Chat with an AI guide trained on the history of Christ the Redeemer. Ask about construction, symbolism, materials, or anything you're curious about - in your own language.

# Tips for Your Visit

## Best Experience

- Use headphones for the best audio guide experience.
- Ensure your device is fully charged; AR and audio use significant battery.
- Visit early morning or late afternoon to avoid crowds and enjoy the best light.
- Stay on marked paths and respect the site's sacred nature.

## Offline Use

- Open the app once online so it caches for offline use.
- Allow notifications and vibration for proximity alerts.
- Audio narration is generated on demand and cached per language.

## Troubleshooting

- If hotspots don't appear, refresh the AR view by returning to the home screen.
- If audio doesn't play, check your device volume and connection.
- For the 3D map, a stronger internet connection improves loading speed.

---

**Enjoy your journey through history.**
