The Red Dice

User guide — augmented-reality city walks in Hanoi & Beijing

Version 1.0 · generated 2026-11-07

4-day access pass — $1.80

Opens every landmark in the app for 4 days, paid in ETH through MetaMask to 0x388ceb4b769c005848bf2734ff174d1cc40977d9. Buying again before it ends extends it.

Historian chat time — price list

30m of chat time	$1
1h of chat time	$2
1h 30m of chat time	$3
2h of chat time	$4
3h of chat time	$6
4h of chat time	$8
5h of chat time	$10
8h of chat time	$16
10h of chat time	$20

Every 30 minutes costs $1, from 30 minutes up to 10 hours, in 30-minute steps. Paid in ETH via MetaMask at the live market rate. Balance stacks and never expires.

1 · Welcome to The Red Dice

The Red Dice is an augmented-reality tour guide for two of Asia's great capitals: Hanoi and Beijing. For each landmark, a red fluorescent line threads through 30 numbered points of interest. You follow the line — on the 3D map to plan, and through the AR camera on site — and scan each point to unlock its story.

In Hanoi: Ho Chi Minh's Mausoleum, the Imperial Citadel of Thang Long, the Temple of Literature, Tran Quoc Pagoda, St. Joseph's Cathedral, Ngoc Son Temple, the Vietnam Museum of Fine Arts, the Vietnam National Museum of History, Bach Ma Temple, and Phung Hung Mural Street. In Beijing: the Great Wall (Mutianyu section), the Forbidden City, and the Temple of Heaven.

Full access to the app is a paid pass: $1.80 for 4 days, paid with MetaMask. Section 2 explains how it works.

2 · Your 4-day access pass

The Red Dice is a paid app. A single pass costs $1.80 and opens everything for 4 days: every landmark, every map, the AR scanner, the photo capture, and this guide. The AI Historian's chat time is bought separately (see sections 7 and 8).

How to buy a pass: sign in, and if your pass has expired the paywall appears over the app. It shows the price in dollars and the equivalent amount of ETH at the live market rate. Tap Pay with MetaMask, review the amount and the destination address in your wallet, and confirm.

Your pass starts the moment the payment is verified on the Ethereum blockchain, usually within a minute. The screen unlocks by itself — you do not need to reload anything. If the transaction is taking longer than usual, a Retry verification button appears: use it with the same transaction, never send a second payment.

Buying again before your pass ends extends it rather than replacing it: the new 4 days are added to the end of the current pass. Each Ethereum transaction is credited only once and is remembered forever.

Payments go directly to the app's Ethereum address (0x388ceb4b769c005848bf2734ff174d1cc40977d9) on the Ethereum mainnet. Never send ETH to that address on another network, and never share your wallet's seed phrase with anyone — the app never asks for it. Blockchain payments are irreversible, so check the amount and the address in MetaMask before you confirm.

If your pass expires while you are mid-tour, your progress is not lost: scanned points stay on your device, and the maps reopen exactly where you left them once you buy a new pass.

3 · Creating your account

Registration with an email address is required — the app is personal: your tour progress, your purchases, and your time balance are all tied to your account.

To register: tap Create account on the login screen, enter your email and a password, then confirm the one-time code (OTP) that we email you. After that you are logged in automatically. If you forget your password, use Forgot password on the login screen and follow the reset link we send you.

You can log out and back in at any time; your data is waiting for you.

4 · Choosing a city and an attraction

The home screen shows your two cities, each with its landmarks and a cinematic hero image. Tap a city to see its attractions; each attraction card shows the number of scannable points.

From an attraction you can jump straight into its 3D map, open the AR camera, chat with the AI Historian, or read this guide from the links on the home screen.

5 · The 3D red-line map

Every attraction opens with a stylized 3D map of its grounds: a glowing red line connects all 30 points in the recommended walking order.

Drag to orbit around the site, pinch or scroll to zoom, and tap any point marker (or its name in the grid below) to select it. The selected point's story appears under the map — tap Open in AR to continue that point in the camera view.

A pink line draws the route you have already walked, and a teal dot shows where you are standing right now. The 2D map tab shows the same route from above, which is easier to read in bright sunlight or while moving.

The map is a planning tool and a companion: use it to see where the red line leads before you set out, or to read any point you can't physically reach.

6 · AR scanning and the 5-meter proximity detector

On site, open the AR Camera tab. Grant camera and location permissions when asked — the view uses your rear camera, and your phone's GPS continuously measures your distance to the current point.

The scan button only activates when you are within 5 meters of the point. A readout above the button always shows how far you are: “23 m to target — move within 5 m”. When you're close enough it turns green: “In range — scan now”. Tap Scan, hold for a moment, and the story of that point slides up from the bottom.

Then tap Next point and follow the red navigation line to the following location, all the way to point 30.

The detector is yours to control: in Settings ⚙ the 5 m proximity check can be switched off, and then works from anywhere — useful indoors, underground, or when you simply want to read ahead. With it off the readout says “Proximity check off — scan anywhere”. Switch it back on and the app walks you right up to each point again.

Accuracy tips: GPS is most accurate outdoors with a clear view of the sky. Give your phone a few seconds to settle; the number updates live as you walk. If you are indoors or your device has no GPS, the app switches to simulation mode and lets you scan freely — the badge at the bottom of the screen always tells you which mode you're in.

7 · The Historian — your AI storyteller

The Historian is an expert AI storyteller trained on the history of Hanoi and Beijing. It knows every landmark in the app in depth — its dynasties, rituals, rulers, and legends — and answers in your language.

Ask it anything: “Why is the Temple of Heaven circular?”, “Tell me about the doctors on the stone tortoises”, “What did the Mutianyu garrison eat in winter?” It's the perfect companion while you walk the red line.

Using the Historian requires purchased time, which is separate from your access pass. Open it from the AI Historian link on the home screen; your remaining time is always shown in the top-right corner.

Voice mode turns the Historian into a conversation you can have while walking: switch it on in the chat, tap the microphone, and speak your question — the answer is read aloud in your language when it arrives. It uses your device's own speech engine, so it costs nothing extra and never leaves your phone. On devices without speech input you can still type.

8 · Paying for Historian time with MetaMask

Time is sold in 30-minute blocks, at $1 per block. You choose any duration from 30 minutes up to 10 hours, in 30-minute steps — from 30m ($1) to 10h ($20). Multiple purchases stack: your balance simply adds up.

How a payment works, step by step:

1. Install the MetaMask wallet (browser extension, or the MetaMask mobile app — open the app inside MetaMask's own browser on mobile).

2. Make sure your wallet holds a little more ETH than the price shown — the ETH amount is calculated from the live market rate and shown next to the price before you confirm.

3. Choose your duration with the quick chips (30m, 1h, 2h, 5h, 10h) or the fine slider.

4. Tap Pay with MetaMask. MetaMask opens with the destination address and amount pre-filled — review and confirm.

5. The app verifies your transaction on the Ethereum network, which usually takes less than a minute, and your time is added automatically.

All payments go directly to the app's Ethereum address: 0x388ceb4b769c005848bf2734ff174d1cc40977d9.

If the on-chain check hasn't seen your transaction yet, use the Retry verification button on the same screen — never pay twice; the app credits each transaction only once, and remembers it forever.

9 · How your time is counted

Time is consumed only while a historian conversation is open — one minute per minute of chat. Closing the conversation or leaving the page pauses the meter; purchases stack and never expire.

When your balance runs out mid-conversation, the input locks and a notice appears — buy more time and pick up exactly where you left off.

10 · Troubleshooting

Paywall won't disappear after paying — Ethereum can take a minute or two. Use Retry verification with the same transaction; do not send a second payment.

“MetaMask not detected” — install the extension, or on mobile open the app inside the MetaMask browser.

“Payment amount is below the required price” — the ETH price moved between the quote and the confirmation. Wait a moment and pay again; the app always quotes at the current rate.

Camera unavailable — the app switches to a simulation backdrop so you can still complete the tour. On your phone, check that the browser has camera permission.

Scan button won't activate — you are more than 5 meters from the point. Watch the distance readout and walk toward the target along the red line.

Distance shows “GPS unavailable” — enable location services for your browser, or the app continues in simulation mode.

Something else — reach out through the app's support channel and include what you were doing when it happened.

11 · Visiting with respect

These are living places of worship, memory, and national importance. At Ho Chi Minh's Mausoleum follow the dress code and the silence. At Tran Quoc Pagoda and St. Joseph's Cathedral, dress modestly and step aside for worshippers. On the Great Wall, stay on the restored path. Keep volume low, leave nothing behind, and the red line will keep its stories for the next traveler.

12 · Your time dashboard

Open My time from the home screen (or Historian time in Settings) to see everything about your paid historian time in one place: how much you have purchased, how much you have used, and exactly how much remains, with a progress bar showing the balance draining as you chat.

Right below the balance is the purchase panel — the same quick chips and slider, with the price in dollars and the live ETH amount. Buy as many times as you like; every purchase simply adds to your balance, and nothing ever expires.

13 · Languages

The app speaks ten languages: English, Ti¿ng ViÇt, N-e‡, Français, Espa
CAA:89. Change the language in Settings!’ Language; the interface swit
is saved to your account, so it follows you to any device.

The Historian is separate from the interface language: it always answers in the language you write to it, so

you can read the app in English and ask your questions in Vietnamese.

14 · Train Street alerts

Hanoi's Train Street is at its most spectacular in the moments before a t
Street alerts, switch alerts on and the app shows the next train time on the home screen, counting down, and sends a browser notification shortly before the train arrives.

Alerts work while the app is open in your browser, so keep the tab open if you are waiting nearby. Your browser will ask permission the first time you enable them; if you decline, allow notifications for the site in your browser's settings. Trains currently pass at roughly 15:20 and 19:20 Hanoi time — these are approximate and shift with the national timetable, so treat the alert as a helpful hint and always keep well clear of the track. Switch the alerts off at any time with the same toggle.

15 · Taking and sharing AR photos

In the AR camera, the round camera button to the left of Scan captures what you see: the live camera view with the red line and the name of the point you are at, stamped with The Red Dice signature.

Your photo then opens in a sheet with three choices. Post to Instagram is the shortest route to your feed: on a phone it passes the photo to your system share menu with Instagram ready to publish, and where that isn't available it saves the photo and opens Instagram for you to add it from your gallery — Instagram does not allow a website to post to your feed on its own, so the last tap is always yours. Share opens your phone's own share menu — pick Instagram, TikTok, WhatsApp, Facebook, Messages, or anything else installed, and post it directly. Save to device stores the image in your gallery so you can edit or post it later. If your browser has no share menu — most desktop browsers, and the in-app preview — Share saves the photo to your device instead, so you can post it from your gallery. Nothing is uploaded anywhere by the app: the photo is created on your device and only leaves it when you share it yourself.

16 · Downloading a site for offline use

Attractions can be downloaded from their page before you set out. A downloaded site keeps its map, its 30 point descriptions, and any stories you have already opened on your device, so the tour keeps working when the signal drops — inside thick walls, underground, or on the Great Wall's ridges.

Stories you haven't opened yet need a connection the first time; once read on site they are saved too. Your scanning progress is always local, so nothing is lost when you go offline.

17 · Terms and privacy

You must accept the Terms of Service and the Privacy Policy when you register — the checkbox on the sign-up screen links to both documents, and you can't create an account without it.

Both documents are always available in Settings ⁉ Terms & privacy: read
them as PDF files to keep, print, or send. They cover how scanning, the access pass and payments work, the 5-metre rule, safety on site, the limits of the AI Historian, what data the app does and does not collect, and how crypto payments behave. Please read them before you buy.

18 · Detailed stories and the audio guide

Every point opens with a full story rather than a one-line caption. Select a point on the 3D map, or scan it in the AR camera, and the app writes a detailed account of what you are looking at — its history, its architecture, the legend attached to it, and what to look for next — right there in the panel.

Tap Listen and your device reads that story aloud in the language you chose in Settings, so you can walk,

look up, and listen with your phone in your pocket. Tap Stop to end it, or Listen to start again. The narration uses your device's own speech engine: it works offline, costs nothing, and never leaves your phone.

Stories are written the first time you open a point and then saved, so opening the same point again is instant. If your device has no voice installed for the chosen language, the app tells you and reads with the default voice instead — installing that language's voice in your phone's settings fixes it.

These explanations are written by AI from the documented facts of each site and are meant as a guide, not as a scholarly citation: for inscriptions, exact dates, or anything you plan to publish, check the site's own signage or an official source.

Appendix · the landmarks and their 30 points

Hanoi, Vietnam — A thousand years of history, walked in red light.

Ho Chi Minh's Mausoleum

The resting place of modern Vietnam's founding father.

1. Ba Dinh Square · 2. Granite Exterior · 3. Main Portico · 4. Marble Steps · 5. Honor Guard Posts · 6. Central Aisle · 7. Glass Chamber · 8. Glass Sarcophagus · 9. Military Detail · 10. Memorial Wreaths · 11. Surrounding Gardens · 12. Lotus Motif · 13. Flagpole Terrace · 14. Presidential Palace View · 15. Ho Chi Minh Museum View · 16. Stilt House View · 17. One Pillar Pagoda View · 18. Memorial Wall · 19. Queue Walkway · 20. Closing Plaza · 21. Ho's Fish Pond · 22. Mango Alley · 23. Car Garage Museum · 24. Rice Paddy Plot · 25. Guard Mount Yard · 26. Banyan Avenues · 27. Lotus Ponds · 28. Memorial Flame · 29. Victory Stele · 30. West Gate

Imperial Citadel of Thang Long

A thousand-year royal seat at the heart of Hanoi.

1. Doan Mon Gate · 2. Flag Tower of Hanoi · 3. Kinh Thien Palace · 4. Dragon Steps · 5. Hau Lau Pavilion · 6. House D67 · 7. Excavation Site · 8. Dragon Yard · 9. Royal Well · 10. Stone Dragon · 11. Bac Mon Gate · 12. Drum Tower · 13. Bell Tower · 14. Royal Road · 15. Palace Foundations · 16. Display Pavilion · 17. Citadel Walls · 18. Inscribed Stele · 19. Garden of Relics · 20. Exit Passage · 21. Archaeology Glass Floor · 22. Dragon Stone Ramp · 23. Restoration Workshop · 24. Ceramic Shards Wall · 25. Ancient Wellhead · 26. South Gate Foundations · 27. Imperial Tile Kiln · 28. Mandarin Path · 29. Banner Terrace · 30. Heritage Bridge

Temple of Literature

Vietnam's first university, honoring the way of learning.

1. Great Portico · 2. First Courtyard · 3. Khue Van Pavilion · 4. Second Courtyard · 5. Doctor Stele Courtyard · 6. Stelae Inscriptions · 7. Stone Tortoises · 8. Third Courtyard · 9. Thien Quang Well · 10. Dai Trung Gate · 11. Fourth Courtyard · 12. Altar of Confucius · 13. Altar of Chu Van An · 14. Four Pillars Shrines · 15. Bell House · 16. Drum House · 17. Reflection Steps · 18. Imperial Academy · 19. Quoc Tu Giam Hall · 20. Garden of Contemplation · 21. Gia Van Pavilion · 22. Turtle Garden · 23. Ink Stone Collection · 24. Music Courtyard · 25. Scholar's Gate · 26. Ancient Frangipani · 27. Examination Cells · 28. Laureate Lantern · 29. Calligraphy Wall · 30. Peaceful Exit Garden

Tran Quoc Pagoda

Hanoi's oldest pagoda, rising from West Lake since the 6th century.

1. Thanh Nien Causeway · 2. Islet Approach · 3. Lotus Beds · 4. Triple Gate · 5. Courtyard of Stelae · 6. Bodhi Tree · 7. Incense Courtyard · 8. Bell Tower · 9. Drum Pavilion · 10. Main Prayer Hall · 11. Di Lac Buddha · 12. Amitabha Altar · 13. Bodhisattva Shrine · 14. Arhat Statues · 15. Nirvana Buddha · 16. Upper Stupa · 17. Stupa Relics · 18. Monk Quarters · 19. West Lake Vista · 20. Truc Bach View · 21. Ancient Banyan · 22. Stone Guardian Lions · 23. Offering Hall · 24. Festival Yard · 25. Monks' Garden · 26. Sunset Terrace · 27. Restoration Stele · 28. Lakeside Path · 29. Evening Chant Hall · 30. Farewell Bridge

St. Joseph's Cathedral

The neo-Gothic heart of the Old Quarter, echoing Paris since 1886.

1. Nha Tho Square · 2. Facade View · 3. Twin Spires · 4. Rose Window · 5. Crowned Cross · 6. Iron Gate · 7. Martyrs' Monument · 8. Church Steps · 9. Virgin Grotto · 10. Nave Doors · 11. Ribbed Vaulting · 12. Nave Aisle · 13. Confessionals · 14. Side Chapels · 15. French Stained Glass · 16. The Pulpit · 17. Pipe Organ · 18. Choir Loft · 19. High Altar · 20. Tabernacle · 21. Archbishop's Chair · 22. The Bells · 23. Handmade Bricks · 24. Compound Garden · 25. Old Presbytery · 26. Sacred Heart Statue · 27. Nativity Scene · 28. Vesper Hour · 29. Cafe Row · 30. Old Quarter Return

Ngoc Son Temple

A jade islet shrine on Hoan Kiem Lake, reached by the scarlet Huc Bridge.

1. The Huc Bridge · 2. Hoan Kiem Lake · 3. Turtle Tower · 4. Lake Promenade · 5. Temple Gate · 6. Pen Tower · 7. The Ink Slab · 8. Courtyard · 9. Tran Hung Dao Shrine · 10. Van Xuong Shrine · 11. La To Shrine · 12. The Preserved Turtle · 13. Sword Legend Mural · 14. Incense Altar · 15. The Bell · 16. The Drum · 17. Jade Islet Garden · 18. Bonsai Collection · 19. Calligraphy Display · 20. Lake Terrace · 21. Stele Records · 22. Turtle Tower Viewpoint · 23. Dawn Shore · 24. Old Quarter Approach · 25. Stone Guardians · 26. Lotus Pond · 27. Moonlit Bridge · 28. Keeper's Corner · 29. Lakeside Café Row · 30. Farewell Bridge

Vietnam Museum of Fine Arts

A century of Vietnamese art, from Cham stone to lacquer and silk.

1. Museum Gate · 2. Colonial Courtyard · 3. Grand Staircase · 4. Main Hall · 5. Ly Dynasty Ceramics · 6. Tran Dynasty Ceramics · 7. Cham Sculpture · 8. Stone Buddhas · 9. Temple Woodcarvings · 10. Lacquer Paintings · 11. Silk Paintings · 12. Dong Ho Prints · 13. Hang Trong Paintings · 14. Court Paintings · 15. Gilded Lacquer Panels · 16. Buddhist Sculpture Hall · 17. Mother Goddess Art · 18. Ethnic Textiles · 19. Ceremonial Drums · 20. Contemporary Wing · 21. Resistance-Era Art · 22. Sculpture Garden · 23. Conservation Studio · 24. Artists' Studio Wing · 25. Lacquerware Technique · 26. Photography Collection · 27. Rooftop Terrace · 28. Museum Shop · 29. Garden Café · 30. Exit Gate

Vietnam National Museum of History

From Dong Son drums to the August Revolution, in a 1932 French hall.

1. Museum Facade · 2. Entrance Hall · 3. Dong Son Drums · 4. Ngoc Lu Drum · 5. Dong Son Tools · 6. Oc Eo Artefacts · 7. Sa Huynh Culture · 8. Cham Sculpture Gallery · 9. Ly Dynasty Ceramics · 10. Tran Dynasty Ceramics · 11. Le Dynasty Dragon · 12. Nguyen Dynasty Regalia · 13. Bat Trang Ceramics · 14. Temple Woodcarvings · 15. Bronze Bells · 16. Ceremonial Weapons · 17. Court Seals · 18. Folk Life Dioramas · 19. 1945 Revolution Gallery · 20. Ho Chi Minh Documents · 21. Resistance War Objects · 22. Trail Bicycle · 23. Dien Bien Phu Relics · 24. Weapons Collection · 25. August Revolution Flag · 26. Ethnology Exhibit · 27. Ancient Maps · 28. Coins and Currency · 29. Museum Garden · 30. Exit

Bach Ma Temple

The Old Quarter's oldest temple, founded with the city itself in 1010.

1. Hang Buom Street · 2. Old Quarter Lane · 3. Temple Gate · 4. Four-Pillar Shrine · 5. Courtyard · 6. Guardian Figures · 7. Main Hall · 8. The White Horse · 9. Long Do Shrine · 10. Ly Thai To Story · 11. Founding Legend · 12. Worship Hall · 13. Altar · 14. Bronze Incense Burner · 15. The Bell · 16. The Drum · 17. Ancient Stelae · 18. Restoration Records · 19. Carved Doors · 20. Roof Dragons · 21. Ceremonial Offerings · 22. White Horse Festival · 23. Silk Traders' Street · 24. Hang Ma Paper Street · 25. Lantern Quarter · 26. Old Quarter Walk · 27. Tube Houses · 28. Bia Hoi Corner · 29. Temple Keepers · 30. Exit to the Old Quarter

Phung Hung Mural Street

A railway archway painted with the memories of old Hanoi.

1. Railway Arches · 2. Mural Street Entrance · 3. The Old Tram · 4. Hang Duong Market · 5. Street Vendors · 6. The Cyclo · 7. Children's Games · 8. Water Puppet · 9. Old Shop Houses · 10. The Flower Market · 11. The Train · 12. Brick Arcade · 13. Community Art Story · 14. Vietnamese–Korean Artists · 15. Contemporary Graffiti · 16. Photographers' Corner · 17. Café Culture · 18. Street Food Stalls · 19. 2018 Restoration · 20. Night Flower Market · 21. Long Bien Bridge View · 22. Railway Viaduct · 23. Bicycles and Motorbikes · 24. Residents' Daily Life · 25. Football Under the Arches · 26. Night Lighting · 27. The Mural Map · 28. The Arch Vault · 29. Farewell Arch · 30. Old Quarter Exit

Beijing, China — Imperial grandeur, traced in neon.

The Great Wall

The stone dragon winding over the mountains.

1. Ticket Plaza · 2. Cable Car Station · 3. First Watchtower · 4. The Ramparts · 5. Beacon Tower · 6. Steep Ascent · 7. Ridge Summit · 8. Arrow Slits · 9. Parapet Walk · 10. Second Watchtower · 11. Foolish Mountain Stretch · 12. Drainage Spouts · 13. Builder Inscriptions · 14. Ridge Vista · 15. Third Watchtower · 16. Barracks Foundation · 17. Branch Wall · 18. Descent Steps · 19. Toboggan Run · 20. Exit Gate · 21. Valley Terrace · 22. Watchtower Loft · 23. Ammo Niches · 24. Autumn Maple Stretch · 25. Ming Brick Kiln Site · 26. Signal Code Stone · 27. Water Spout Arch · 28. Rebel Path · 29. Sunset Battery · 30. Homeward Steps

The Forbidden City

The palace city of twenty-four emperors.

1. Meridian Gate · 2. Golden Water Bridge · 3. Gate of Supreme Harmony · 4. Hall of Supreme Harmony · 5. The Dragon Throne · 6. Hall of Central Harmony · 7. Hall of Preserving Harmony · 8. Marble Ramp · 9. Inner Court Gate · 10. Palace of Heavenly Purity · 11. Hall of Union · 12. Palace of Earthly Tranquility · 13. Imperial Garden · 14. Bronze Lions · 15. The Sundial · 16. The Grain Measure · 17. Nine-Dragon Wall · 18. Hall of Mental Cultivation · 19. Six Eastern Palaces · 20. Gate of Divine Might · 21. Corner Towers · 22. Moat Walk · 23. Vermilion Walls · 24. Golden Roof Nails · 25. Unicorns of Harmony · 26. Vats of Water · 27. Crape Myrtle Court · 28. Ice Cellar · 29. Servants' Passage · 30. Coal Hill View

Temple of Heaven

Where the emperor spoke with the sky.

1. West Gate · 2. Entrance Avenue · 3. Hall of Prayer · 4. Three-Tiered Terrace · 5. Dragon-Phoenix Marble · 6. Wooden Pillars · 7. Blue Glazed Tiles · 8. The Echo Wall · 9. Triple Sound Stones · 10. Circular Mound Altar · 11. Heart of Heaven · 12. Fire Stove · 13. Divine Kitchen · 14. Butcher Pavilion · 15. The Long Corridor · 16. Abstinence Palace · 17. Cypress Grove · 18. Nine-Dragon Cypress · 19. Echo Chamber · 20. North Gate · 21. Seven Star Stones · 22. Rite Exhibit Hall · 23. Bells and Chimes · 24. Lingxing Gates · 25. Rose Garden · 26. Ancient Scholar Tree · 27. Lantern Court · 28. Drought Prayer Altar · 29. West Avenue of Cypresses · 30. Park Farewell
